[Re: IRELAND](#)

]well, that copper stuff here costs A LOT more or maybe one needs to look around a bit to check prices...

hmmso maybe use the normal plasters as you mentioned instead of that grey stuff that does not set quickly enough

thanks for the story and the material and, of course, the good work itself

the BSB really pays off Jenn, so strong

puts everything in the shadow ...really really strong, almost too strong, under normal conditions but as we know the aerial bombardement intensifies so...

wont hurt there for to put up one or two of those to keep in the lead so to speak and keep the sky clean and provide much more than just that.

[Re: IRELAND](#)

Yes the BSBs are my favorites. Just got two on the go now, but have promised my best one to a friend. The copper pipe comes in 5.5m lengths and the price changes by the day, with copper being a 'commodity' strangely enough. We can use 1/2 " pipes (a lot cheaper than 3/4" pipes) as we made an ICB which is different from the Croft version in that there are no crystals in the pipes. The lengths were about 17euros yesterday, but sometimes they can be 14 euros, strange.

[Re: IRELAND](#)

Just looking at another video of the awareness movement in Ireland
very good one..big wow...good work

oh...and some extra pics from Ireland

By Juliet

Another happy collection of plasterite to gift to friends. Acrylic paints with glitter over. Some for my garden

. The next job is to start to hide this wonderful repeller of negative energy in woods, ponds and rivers.

Please don't be too casual about all this plane/helicopter activity. Maybe go inside whenever they come over - you know very well the unexplained things that happen to people

Re: IRELAND

True...But...there it comes....doing this for two years now and as reported the first time I made good plasterite after advice of Timo and some members of the old orgonite plus club it truly got pumping, four huge cones I made in a weekend and that s when all hell broke lose , out of nowhere the helicopters came

daily, got fed up with it and intuitively gifted one of those, that lured them away rather efficiently, put it somewhere a couple of miles away and they got confused so ...you know...just calling a dog a dog here, that s all I do..Two and two equals four, I am that straightforward..I am not going into hoopla, just show things as they are...It is up to the individual to do their own reasoning about it. As I said the program is on, the aerosol program..so we can discuss into infinity whether it is good or safe or jadijadija....the program continues so...

anyway it is good folk see what s going on....this applies to all orgonite basically or any other activity that gives a cog in the wheel as they say.

Re: IRELAND

Norway

as an old school mate came by , I rose to the occasion and gifted her a BIG plasterite heart
so if you can , have some goodies around if you get folk so you can share the energy with them , the
good things

she also brought her kids, so gave an extra bag of painted plaster hearts

actually, was making the colored hearts for another girl, who saw my plaster hearts on the garden
wall

and want them too..yes...do I smell a marketing opportunity

...so will have to make some this evening, easy
couple of minutes

Re: IRELAND

Of course we must be careful, but that does not mean we should give up or let ourselves be taken hostage by fear and the other fine things on the menu of the control grid we live in..and, between you and me

I dont give them the bird..I do like them, purely for confirmation purposes, they " care " you see...

they dose us with their care and love all day since a decade now..they are too generous....

I just pretend it s all just ...coincidence...

[youtube]s6EaoPMANQM[/youtube]

Therefor it is best , if that is feasible on the territory , to do water gifting, just the bottles, quick and swift no need to start getting tools out of the car and start digging holes LOL that s a bit obvious....and dont throw them in , the bottles, just slide them in..casually when it comes to gifting it is , maybe, better to do a lot of runs in a short period and than stop for a while...thats my view, every day for a week or so, fifty kilo every gift, all over the place
so the energy fields start popping up like mushrooms...well, done my gifting here for sure so I take a little break now

and had the same experience with the not hardening of the plaster today with some items, as I left the bag open , unclosed, for some days, silly me the plaster is totally fubar...it just wont harden anymore, stays like yogurt, you know peanut butter...I forgot to close the bag

Re: IRELAND

Broadcasters are unplugged, for the moment, sky remains blue
well, made some big cones extra so..who knows..about eight of them, those big ones, one meter tall
they seem to do it just as well along with some other tools of light
we will see

helicopters visits have decreased dramatically
after unplugging they left but at least it shows the power of the broadcaster
if things get worse in the sky they will be activated again
as simple as that

another little vid to go along with it all
these I post hidden so only here you can watch them
Its not meant for the public in that sense...
but as I cannot embed other sites than Youtube , it has to be that.
Unfortunately

Re: IRELAND

an Irish Gifting report
anonymously of course...

From:

Sent: Thu, 2 Jul

To:

Subject: Re:

You'd be a great addition to our page if yo could get yourself unblocked somehow. wish you could.

On Thu, Jul 2, , zzzzz wrote:

BVM in this case is the Blessed Virgin Mary

Another quote from M today:

'Gifting the northside liffey today again - two half kilo bottles of selenite at O'C..... and Ha'..... bridges to follow the pair of orgonite TB's earlier in the week at the same locations. Tb's at J..... stop. More Selenite in Lotts. The gridding continues'

Added by J ; 'Nice quote from ER (Healer – USA) from a couple of months ago - 'Im finding that gifting waterways with big soda/juice bottles filled with plaster makes it impossible for them to keep a steady spray going, and the orgone energy flows with the water, turning however far downstream it reaches into a type of cloudbuster too. That along with gifting towers makes big poofy clouds with bright golden sunshine and birds flitting around everywhere.'

Then from M: Orgonite tb underneath the Dart lines exiting Connolly
- this is also on a bridge spanning heavy traffic. I put a selenite TB
at the far end of the same platform which set to work immediately.
9 mins •

M A curious thing happened just after I "gifted" the north side of
the Ha'penny bridge - the bottle made a thunk and a splash - these two young
wans came straight over to me and asked me what was that I threw in. I said it
was a bottle. She asked me why I threw it in and I said to see what kind of
noise it would make.

She looked at me and narrowed her eyes for a second - "you love this water
don't you?" she said and she slowly poured three times into the liffey from her
own bottle of water, libation style, as if blessing it. We chatted away for a
minute, as you do and then they crossed the road away.

5 mins •

Fantastic work M.

Don't forget to try to use up the plaster, as it goes off a bit when the bag is opened.

I thought this was a pleasant 'interchange' Don't know if you want to use it or edit it somehow, it's from our page, Orgone Appreciation xxxxxx today.

On Thu, Jul 2, zzzgmail.com> wrote:

Quote from M who has been gifting around Dublin City

Centre: Noticing the quality of the selenite energy today now I'm not surrounded by it at home. I took a few pieces into town this morning with me on a whim and ended up gifting in Station - pegging sTB's onto the and leaving half a kilo of it behind one of the machines. All a bit of diverting lunacy on the humdrum commute.

I sensed a response in the fields of the various locations to the pieces - a good one - but no chance to hang around for any further observations. At the school where....., however there's been a noticable shift since D..... gifted his pal F..... in the office with some plasterite which he'd hand painted for her. F..... used it as a stand for a holy picture of the BVM!

Selenite feels "higher" - gentler but more pervasive than brassy, intense orgonite. I can sense that today upon taking a few pieces into the city. There's more chance for them to work on the "acute", situational disharmonies which probably don't happen much at mine any longer

[Re: IRELAND](#)

Intentions

Received a story, it's from Eric R...

from the USA

It's a good story

Comment from ER following a little discussion re the G2:

If I use more salt, like a 2/3 of the salt/baking soda mixture I find it turns into a kickin cloudbuster that makes big poofies show up but doesn't drop any excess rain.

Intentions lol....Ok let me try to remember the progression because I've got a pretty complex list of stuff I can do now....

Ok so the first two or three pieces I made I didnt put intention into and I think the energy made me more open to what the plaster wanted me to do, and the very first ones I put energetic intention into were simple. BLUE SKY.

After a bunch of flybys and helicopter intimidation, I asked the plaster how I could mitigate that and it gave me a download. Imagine a 3D graph where they show how things like gravity work on a computer....The area I was in was orgone deficient, so as soon as I made the plaster, the flat orgone deficient part of the graph ended up with massive upward spike and that is what they detect. The intention was to smush down that spike so that it doesnt lessen the amount of orgone energy, but it spreads it out to make the whole area raise up, but with no spikes....Push down and spread out. Once I had free time to experiment with no interference from scanners and scalar machinery, that is when I started to get creative. The first sentient BSB I made I connected to everything I had made so I could direct intention at it and all the other gifted pieces would resonate with it too....that is my home cone.

- *OPEN ALL 3RD EYE'S WITHIN YOUR INFLUENCE
- *SPEED RECOVERY AND HEALING
- *INCREASE IMMUNE SYSTEM CAPABILITY
- *MAKE ME INVISIBLE TO PREDATORY INTENT
- *MANIFEST AND SUSTAIN COUNTER FREQUENCY TO ALL NEGATIVE VIBRATIONS
- *CLEAN AND PURIFY THE AIR AND WATERS AROUND ME
- *STRUCTURE MY ENVIRONMENT MOLECULARLY
- *IGNITE THE FIRES OF LOVE WITHIN YOUR INFLUENCE
- *ALIGN ME DIRECTLY TO DIVINE PLAN (this one is a bitch...if you fall out you will get slapped back into line lol)
- *SPEED UP PLANETARY LIBERATION

Im sure once you guys really get the hang of it you will start popping up with intentions I will be like, "Why didnt I think of that"

Re: IRELAND

'Like'

It's great how information is still passing to and from, learning curves, no 'full stops' saying that's it, that's all there is. It's wonderful to be in the middle of it.

A follow up comment to Eric's note from my colleague M:

'Eric - the counterfrequency intent - through the lens of Homeopathic methodology - isn't necessarily something you'd want to apply to all situations. Blanket invoking an oppositional duality would carry a handle with care sticker for me, at least, I'd be curious to hear your view.

One of the issues with the Warrior Matrix culture of Orgonite gifters is all the military speak - whereas the task at hand is healing, not war.'

Comment from Eric: I havnt ran into an issue yet, but with the selenite, always follow your first gut reaction....its pretty much the selenite telling you how it wants its body made

My comment: F..k the Geo-Engineering B.st..ds

Re: IRELAND

That is true, the main focus is love.

As simple and pure as that.

But, as we are humans, other emotions, motives, etc are always involved for the good or for the not so good.

There are those who turn the other cheek and put their heads in the sand
when your head is in the sand your back part stick up to be kicked even more...
and there are those who follow the eye for an eye method.

The best thing to do is to stay in balance , the white and black wolf story , again.

To learn to deal with both sides inside us, the two powers, of light and darkness and keep them in check so to speak.

Not ignoring one of them as so often happens, either by turning the other cheek and ignore the evil for what it is or go into full non stop uncompromising warrior mode thereby destroying what s left of the white wolf in the process.M does make a good point nevertheless

we are, as stated in the warrior matrix hoopla, lured into a dualistic mode, which they like a lot to kick us even more and the only way to really advance is to step out of the vicious circle so to speak the " programming" , that is a fact

Yes, I do learn sometimes, like the method Eric uses, silly me, really so obvious, but I missed it.

Well I did that with great intent and today there were no choppers hahaha...ah well..time will tell.

The first day without helicopters.

hmm...has to be followed up.

well it is followed up, unfortunately still got two helicopters, daily
used to that, anyway, I will try harder

maybe I am still soaked in my " warrior mode " too much heheeh

besides they harrass us for years so we got used to it
it does not bother me much honestly
those days are long over
would be best if I gift broadcasters but there are not many aware souls around here to gift them to
love that phrase, the selenite is telling you what it wants, yes , true, it does.
thanks for the comments

Paris Climate Change Conference

<http://cfcc.event.y-congress.com/Scient...setLng=en#>

This is an interesting interview with our Irish colleague Terry Lawton, Max Bliss and Michael J. from the Paris Climate Conference. Well worth a watch. Such dedication from these guys, a big thank you to Terry who puts as much effort into raising awareness in a little town in Co. Wexford as in speaking to scientists at the Paris Conference.

Whoops, sorry not a great link. I'll try again.

Climate Change Conference Paris 2015-Day 3-Activist Discussion.

Whoops again, admin help needed with this please

Re: THE IRISH TOPIC

lady J and lady Juliet

I knowyou dont want the [i]" gifting queen" pic on there, but, well..it s not too bad you know first time I actually see such a thing, I think it s quiete cute to be honest with you

Besides , isnt it the truth ?

I do tons of gifting nobody ever made me one ...Lol ...wink...tongue in cheeck...

So thousands of kilos of plasterite later and not even one of such a cute pic for me

just police harrashment and helicopter intimidations...oh and lots of blue sky, healing, etc sure, all benefit, but we wont get rich doing this work.

It is something we must do

to show we are humans

yes they are working on it and so are we to do something about it and we do a good job

by Lady J

Back home after a good trip, stopping at the River to gift 2 x 2 kgs, it will be able to travel a long way to the source. Then back to Dublin to look for the elusive pyramid shaped cone. One place had a dinky little 3 sided pyramid, bought that. They directed me to another company called, lucky I had sat nav on the phone would never have found it otherwise, in a rabbit warren of roads. I was shocked when I got there to see it was situated just beside a huge electricity ?? with very many masts, towers. Chatted to a pleasant man and told him all about Geo-Engineering, what I was doing, gave him links, gave him 2 little hearts (he put them high up in their window) and got permission to leave my lovely big cone that xxxx rejected in their property, hopefully to help the negative energy that must be there all the time. So I was glad.....didn't want it. Also bought a great eco friendly mop, all eco friendly

products in that shop. They had the large cone, was a bit shocked at the price but bought it anyhow, hope it's good.

Now looking at the awfully untidy kitchen and conservatory There goes my free day, but it could be worse.

Clever Juliet has sold a few 'sets' to raise money to buy two more bags of plaster, I'm very impressed with her. She does such a beautiful job decorating them, must get on FB now and heap her with praise, also maybe send you her latest photo.

Re: THE IRISH TOPIC

Jenn, I will slow down on postings and stuff

yes...I think I ve posted plenty so...once in a while I will pump something out , but in general it will become somewhat calmer...you know...more in the background as most things that needed to be said have been said by now in my view at least on the forum here, most gifting is not reported anyway. Just examples. So newcomers can catch on...get it going

Thanks for all your contributions also to the other Irish rebels over there.

Totally politically incorrect, making Life Pillows, tools of light of all sorts, plasterite, broadcasters and the list goes on... and on...

even the neighborhood kids have fun with it, good work.

Keep the awareness raising coming , it is so important, not for most orgonite folk, we are not so good with crowds

But you are and you do a good job at it.

Re: THE IRISH TOPIC

Just had to tell you, I don't know did I send you a photo of the heavy, squat 4 sided obelisk we made last evening, got a reading from Alexander as follows: 'Do not know how you developed so fast. Have not read anything that high before. i am getting 333 BILLION bovis. Have not done

range or anything but that is serouse. HUGS Alexander ' I know you poo pooh at Bovis but that seems to be SERIOUS as he says. Are you proud of us?

Yes you did send the photo of the beauty, I d say at least 333 billion

massive piece , honestly , but wanted a second opinion before I start getting overexcited LOL
so you hear it from someone else

mouth fell open just seeing that construction

you really got it right with that one

but I was curious if others on FB and such things would catch on to it

and they did...good news

But even on the old forum once they started playing with it the life force scale went overboard pretty fast...hehehe

The best tools of light available and for free ...but most still wont touch it hahaha....shows us a lot doesn t it?

Proud of you ?

I am crazy proud of you all

big time big time...over time all the time...big hugs....top work.....yes, alexander is right .it is very serious indeed...I dont know why or how you developed so fast, it happens but it is very rare...have only seen a few do that, like Eric and OLG, to name a few, yes Dustsand too, the dutch guy....Most take longer, like me, to really grasp the whole magnitude of it all

it s one of the best pieces I ve ever seen

just as good as sand and sun s piece of the old forum, that s also a fabulous one

Re: THE IRISH TOPIC

Lady J , you do some awesome stuff over there, amazing, and I am not easily amazed nowadays, but it happens once every blue moon

By the way as sales have been halted for the German model I took the opportunity to make a movie on how to make those energy cones, plasterite, as natural as can be.

I am pleased with it, so the techniques keeps moving forward, even on a grassroots level.

It s also posted under the Energy cone topic.

So you also went into the Life Pillow , the resin style, hmmm

that s ok...we wont ban you

, actually we love it ...resin is adequate for certain purposes but , for me, it is not the breakthrough, selenite however is on a larger scale

for some pieces, like LP , pendants, etc resin is needed, as simple as that....Still plasterite is the way to the future...Simple facts no one really likes to hear...

Facts dont count nowadays...

.But , seeing your energy work output , ah , actually it is your versatility that amazes me.

will post your stuff here it is so gorgeous

I like your natural touch to the resin Life Pillow

wow, some folk are actually making this thing, hmmm , good for you Jenn, good for the rest too.

Top pieces

You are too modest , they are very pretty, very pleasant

Re: THE IRISH TOPIC

Bad decision taking them down from Youtube Sunflower, good decision putting them back. Vimeo wasn't so easy. Yes that 'ley line' suggestion could be the next 'Big Thing' getting shivers here thinking about how things are progressing - little ideas or suggestions surfacing, do we grab them and run with them, WE MUST, all this is synchronicity not random chance. It's reminding me of a fractal, starting with a tiny little whorl then spiraling out, maybe I'm being fanciful but I don't think so. I still think Social Media must play a part.

Re: THE IRISH TOPIC

I'm feeling very excited. We can start here with Newgrange, the prehistoric tomb older than the pyramids, which is the centre of a huge energy portal that covers most of Ireland, this links to Skellig Michil in Kerry which has a huge amethyst at the centre, from Newgrange then links to St. Michaels Mount and Mont St. Michel and from there to the pyramids. Of course, there are surely huge energies moving there already, but if we can give them a boost with the positive energies of selenite, who knows what will happen? I was already thinking of gifting to my favourite neighborhood tomb Fourknocks, that will have to be soon for sure.

Re: THE IRISH TOPIC

Oh J, you know I do know a lot about Ireland most folk dont know , never heard of, especially its amazing long history.

Although that is not an orgonite topic per se. Yes much much older than the pyramids, there was a time when Ireland was the Egypt of this world, but you wont hear that but it is true, there is a lot of knowledge hidden, again a very deep story , not for this forum, at least not all of it might startle some folkwell we can touch on it , once in a while, we will see about that, good line of thought.

Took the opportunity, after gifting, to make a down to earth movie about life force energy making, natural style.

Not too fancy but very very to the point.

Essentials only, a bit shaky, the movie, one hand filming, jadjia, but as realistic as can be

not so distant, very close in a way

maybe of interest for newcomers

dont forget to put the intent in, but I always do that beforehand, while preparing for that work, so it moves with me so to speak

During making the helicopter showed up, right on top of me, thanks guys

so it pumps

40 minutes after endless chemdumps the sky is as baby blue as you can imagine

deep see blue

amazing

sylyphs dance all over the place

40 minutes ago is looked more like hell than heaven here

Re: THE IRISH TOPIC

For the time being, will be my last traffic cone model, a big one, this time with the expensive plaster, twice as expensive as the regular one but gives that marble hardness and superb finish , so it is for myself.

Other cones will be gifted

No recycling with this one, the whole load went in there, to give it extra strength, also, extra crystals of all sizes, gemstones, herbs, sea shells, the lot....everything...

give her the edge

also gave a special intention, objective

Hopefully it comes out in one piece as it is an expensive one, one bag went in, 10 KG , 3 kg of sand, river sand , two full hands of salt

Re: THE IRISH TOPIC

Jeh...nope...and eh...maybe ...and eh ..yes..the big one yesterday fell into pieces, is that good or bad in this case that is good..why...because I am gonna gift them anyway, so we are not going to bother with that piece further

like old bread does not matter gonna toast it anyway...sort of thing...

a new big one, with rapid plaster, is still cooking, takes some time if your pour in 25 kg in one go...

than, made a mold like I did before, for replicas of the Energiekegel

those sheets, but all "kaput" so..had to find some " Ersatz" ..and I did...mixed it with some paint, like the ones you saw before

those " Irish Cones", etc

Re: THE IRISH TOPIC

people are leaving this planet earlier, all folk have allergies, lots of kids with asthma, you name it new normals

nah...biggest crime of the century someone said, big time yes

massive program, they "them" call it a large project...

well, that's true alright

the whole planet covered by "whatever" by "whomever" for whatever purposes jaja

I mean come on, can't get more blatant than this eh...

These folk won't stop

the last sentence does apply to those involved

it is unbelievable

and 90 % walks with their head in the clouds and call us "weirdos"

yeah..sure..

than you have those five per cent who say, well they're probably protecting us

yep...

than you have about three per cent, that's us, who figure it all out

the heart of the matter

what's really going on

so they only have to worry about us you see

it's like that

the rest will go into the new world order willingly, it's like that J

it's like that

couldn't care less

as long as they can play with their iPhones and entertainment, parties jaja

it's all no problems here doc...

but soon the extra money they have will be flushed out by the agenda

austerity you see, big time

game over and then they start to nag and riot

controlled of course

all by design

so they can unleash their dogs on us

isn't it so?

major excuse

we had to do it

we had to restore order out of chaos

where did I hear that before...

how did you come up with that idea??

wha....orgonite hearts, the natural branch in this case.

Very clever, way stronger and in total balance with nature

it's like to compare real fruit to vitamin pills (resin)

and you can punch some nice energy holes in the matrix, for free

kids love em, they are not dumbed down yet, have still some sensitivity in them

will be drummed out of them later on ...

that s how it goes
so good J, you are so good.
anyway , so we can at least use this little shed here to promote some of the good work
because in most European countries we hardly see much come of it , the awareness movement
is important
it s the key
orgonite is the sword if everything else fails although it wakes folk up too
but the key is awareness
it has to come from the heart
so it is best to use both hand in hand
that s at least how I see it
modified bees by Monsanto, wow, yes they can do that
never heard of that , I knew they could do it but now they are at it
so...there you go..can only pollunate Monsanto crops
oh man, they really laugh at us up there you know
they just laugh at us
they really dont give a fuck about us
it does not even occur to them
we are just cattle
and than one would think communities would or could or should work together , in some manner, to
tackle that shit
but nope
divide and conquer galore
in most clubs, not just orgonite clubs
the controlled clubs
most of them anyway
don t dare to speak out plasterite
what can I say
oh boy oh boy

[youtube]ercwrDXlrXU[/youtube]

Love that teddy bear by the way... with chemtrail flyers

2Geoengineering Awareness Day - Enniscorthy 14th June 2014. - .jpg (59.88 KiB) Viewed 265 times

1Geoengineering Awareness Day - Enniscorthy 14th June 2014. - .jpg (62.08 KiB) Viewed 265 times

lots of good folk in Ireland Jenny , I dont know why, a real rebels nest

seems like it is born into them , this obnoxious behavior against tyranny LOL

Look, that guy who arranges the awareness meetings, he is a good one

keep him close

wow he knows his stuff

[youtube]sjtX_h3eETA[/youtube]

Re: THE IRISH TOPIC

esp for J, I used plate mats as molds, yep
dorky eh...but look how cute the outcome is
amazing..and you cant buy that mold for money....
also you can decide how you want the conical shape to be, wide, small, etc
and, as it s plaster , just use some water to clean it , done.
Disconnected all radionics now, all of them, just for testing
Just a few big cones here now pumping and they are pumping allright
blue as can be even if those morons keep coming over , not a chance for them
so just testing to see if the big cones hold over longer periods independently of the BSB machines
if it gets worse and nowadays it sometimes get to that stage they will go online
again,must give notice I will slow down ...not " break down" as Alex said on FB while ago..oh teasers..

Well there is nothing for me on FB anyway , so no love lost there.
Hope the group there gets some awakened souls who can actually think, try to find those nowadays.
But, in Ireland, there seems not to be shortage of aware folk who know what s happening around us
this take over that s going on
on all of us actually
all in the same boat but , instead of working together , nope, they still must crush and attach the
selenite
ah jeee....there s love and freedom for you...and just because of money
the root of all evil hmmm
great..I am so impressed....not....
All plasterite I make recently is simple and effective, the Josh method I call it, pure basics only.
Not even the old school crystals go in for some time now, as the whole device is a crystal in itself
so why bother putting one in , unless for specific reasons, like broadcasting
so it gets ultra cheap and ultra blue here, of course the effects go beyond that , esp when it comes to
plasterite as it works on so many more levels than the resin stuff they keep pushing down our
throats wether you like it or not
you d better eat it and like it..or else....

Pyjama people Josh called them

hmmm...well I have some less delicate quotes too for such folk, but...wink...
we are being put under, big time now, and they refuse to give folk access to a free method
how do you call that, you figure that out for yourself
they are all in it as far as I am concerned
all orgonite hoopla
totally wrecked
nothing to do with love and freedom
just big bucks and sheeple management
that s what it is
so it s not just the ruling elite that doesn t give a fxxx about us....it s them too, those jokers.
yes I better use the xxx here before things get too wild...

voila, that has been cleared too...
no sucking up here
just facts
the things everybody seems to be allergic of nowadays
just down to earth simple facts
so we start skipping molds too now eh ?
hehehe
just eh ..what s that word, english...plate mat ?
for such things I use that fast hardening plaster, so easy , amazing, no fuzz
just mix that energy brew and pop it in, ten minutes later, unfold the plastic sheet and it is ready
just like that

yeah I know , plasterite aint that cool, but I find it very cool
doing all you want, all intentions, whatever for free
again,healing topic not for public consumption...
I find that mega cool
most of the orgonite community is a shame now
so much rubbish going on
totally degraded
what once started as a way to a better world ah jee
totally owned and controlled
for the most part
the problem is those players know eachother and they dont dare to speak out
about plasterite because well.... you know why..
\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$

2995222469_qsd88de26d968.jpg (49.42 KiB) Viewed 276 times

...and that s so sad,isnt it, to be on a leash for the rest of your life
because those buddies , those "big names", that self appointed Royalty on top, eh big con men are
cashing in on disparity
of the ordinary person, keeping free solutions away from the public who dont have a clue what s
going on , isnt it sad ?
I find that very sad, dissapointing and mean.

but that s probably just me, one of those " nutters" who uses a free , far more advanced and effective
solution to problems at hand....in total balance with nature and there for that effective, simpe aint it
?

no..it s not just me , there are many many others , actually there a a lot of folk who had enough of
this selling out and control freak behavior , believe you me.
not something to underestimate..voila, there you go..
feels so refreshing...suddenly...hmmmm
like a new plaster cone coming into existence...
you know...for free.....

oh ...blue sky pics, got a lot of those
for free

Re: THE IRISH TOPIC

Another of my 'Cute Little Child' stories - at lunchtime today I had a little chat with one of my 5 year old selenite heart pourers from last week. I asked her had she given one to her friend who was sitting beside her on the path. 'No', she said, I'm going to give one to my friend who's hurt her foot'. 'That's a great idea' I said. 'Yes', says she, 'I think that's the best thing to do, to give them to people if they have an injury'. I tend to agree with her

Re: THE IRISH TOPIC

I heard the new pourer was "groomed" by OLG himself oh la la.... what honour...

Yes, I even made him admin of the old club on facebook, after my eh...breakdown...LOL...well happens...

as we are in this uphill battle all the time and our stamina has limits when dealing with the public at least mine has...but to my defense it were facebook people so ..you know...do I have to explain this or do we get the picture...

I hope he is doing great...Been there for half a year and not much happened

except unbelievable troll attacks that teared my first group down
within a couple of weeks...organized attacks, happens all the time, nothing new
they sneak in and if you dont watch your back for a minute they jump on ya
all at the same time...damage done....those were the days
folk from MIT coming in to investigate the selenite
of course they were not allowed
it is good he build up the group on FB again
I dont know if it s worthwhile, you know...facebook, social media, not the sort of public we are after
eh ?
Popcorn folk I call them
maybe it s better OLG stays on FB LOL
before he does his alien thing again hehehe
oh boy...well nobody is perfect that s for sure
no exceptions there
hmm do they miss my rants yet, did some good ones there eh , remember those
lots of < crickets > there

after I left they suddenly all started doing plasterite LOL LOL
teasers
why did that had to take a year ????????

better late than never they say so true

.....

I just could not keep up with the sheeple , it s just too much for me
for most folk who start to grow , a bit, it is unbearable
to deal with those still under the spell
Eric and OLG and some others there are more capable than me dealing with those newcomers
so the group is in good hands
one day it will all pay off
DustSand is there too, jee what drives all folk to FB, I wonder
dont get me started on that one
On the old forum we did not have that, the Josh healing club, no sheeple there
I know some of them vaguely , I wont call names, watch this place here
from a distance
that s ok
maybe they recommend it

Maybe if you see some nice selenite there or other advanced tools of light, just fork em over, we can
put it up here
to promote it a bit without the usual BS one finds on most forums
I wont have BS in this forum
There is enough to go around for all on other "forums" if we can even call them that, propaganda
subsidiaries
It s all about money and control
and they "fight the sytem" ah ..may I laugh please they are part of the system
ah the new pourer

my sandy pieces

Re: THE IRISH TOPIC

'An introduction to the power of group meditation and the logic behind the upcoming "Messages in Water" event to be held at the Lough (in Cork southern Ireland).

Messages in Water is a group meditation and positive emotions event based on the teachings of Dr. Emoto, group intention and water consciousness. Where we get people of Cork to circle the Lough holding hands as part of a large group meditation surrounded by nature, for world peace, to create an awareness for suicides and show the importance of supportive united community.

Messages in water started as there were many suicides in the area and we wanted to unite the community and symbolically show that if anyone in Cork is experiencing negative emotions that there is a community who genuinely care and are only happy to help and support you.

Studies Reveal Group Meditation Can Lower Crime and Suicide Rates in Surrounding Cities' To be held on 31st July, Blue Moon.

I just contacted the organiser and suggested they gifted some bottles of selenite into the water at the same time, he thinks that's a brilliant idea. I will send him on some, unfortunately can't be there as I've something else on that day. Feeling happy.

Re: THE IRISH TOPIC

Feeling inspired and even happier as the guy involved has come fully on board in relation to selenite, wants to focus on it at the meditation, wants to become a plaster pourer as soon as possible, I've arranged to make as many little hearts as possible and get them to him in Cork over the weekend, for distribution to more than 1000 people Friday 31st! I can see myself being busy. Such a lot of synchronicity in play this morning, stemming from one little post. He's equally happy and fascinated, because his name is Banks, (he has a huge connection with water) and was delighted to hear about all the selenite ingredients being connected to water.

Some quotes from him during our chat about selenite: 'I'm just pretty amazed, I'm looking forward to getting into the plaster work.' 'I'm laughing at the beauty of it all' . 'The world works in amazing ways in fairness'

Re: THE IRISH TOPIC

Good post J, well yes, selenite is a healing method pure as can be, good you reached some people who still are in touch with intuition and the making the world a better place aspect.

well, maybe it s not for everyone

that sort of approach , but it is good and nice to hear.

there is a thing going on with water and selenite , cannot really explain it but it s there.

that s why water gifting works so well

hehehehe

that s some promise....

very good of you

hope you do succeed in that goal

Re: THE IRISH TOPIC

Sharing a post from Vicky K: 'I have to admit, I wasn't sure, how strong the selenite is, but all my doubts have been brushed away. 10 mins ago we had a military helicopter circling around our house 3 times very low. They looked into our garden, possibly took pics too, I don't know, for me that's the proof, I was looking for. It was pretty intimidating I have to say , but also confirming, unfortunately my camera was upstairs. Here are 3 of our cones that are in our garden.

1 (2).jpg (129.5 KiB) Viewed 257 times

2 (2).jpg (131.91 KiB) Viewed 257 times

3 (2).jpg (131.57 KiB) Viewed 257 times

Gabhain O Dalaigh same thing happened me

Jenny Dissident Mortell Did it really Gabhain - when was that?

Gabhain O Dalaigh First couple of days but I live close to a hospital so I didn't pay any attention to it

Mark O'Sullivan You have achieved helicopter!

Orgon LoveGod Well it sure it's a sign you did it well hehe.

Congrats! heart emoticon

Jenny Dissident Mortell I've never been really buzzed

Orgon LoveGod So what.. you are doing an amazing job at raising consciousness.. you'll see the results in surroundings..

Vicky Kyriakopoulos it's great conformation, but it was also surreal, as we don't have a big military presence here in Ireland....you should have seen our neighbours watching that thing flying around, at some point, I thought, they're going to land in our garden...time to make some more LOL

Vicky Kyriakopoulos Jenny your time will come, no doubt!

Mark O'Sullivan Jenny - your house was buzzed the day of the workshop - and mine by the same helicopter five days later.

Another comment and photo from Vicky K. 'Here's the wall of hearts inspired by Sunflower, they glow in the dark too'

Re: THE IRISH TOPIC

thanks for the story , appreciated

serious storm yesterday so was busy with that
also did some painting on some objects and thought about gifting
also like to reflect on things, do a bit of growing once in a while, steady pace
also try to look around me what's going on, and go into topics, like your post about Max Bliss, the
geo engineering conference in Paris, etc etc
by the way, he was there too, our man from Ireland

<http://cfcc.event.y-congress.com/ScientificProcess/Schedule/index.html?setLng=en#>

yah, it's all a big lie basically, that's what it comes down to at the end of the day
this whole geo engineering tada...
basically it's about so many agendas coming into play, aerosols and haarp to control a lot of things
so I don't know why the word scientific often comes up ..but ...you know...
it is very simple we are being dosed like bugs and they use these techniques to control the planet in
many ways
old techniques by the way, nothing new or fancy about it
patents from the fifties onwards
also removed most fancy movies, just kept the basic ones floating in the youtube soup
the how to make ones...junior school
as hardly anyone watches them anyway...jee...so " unexpected "

I also see the links you provided to the reports on YT about the Paris Conference hardly attract any
viewers either...

usually that's a give away for truth
so we do promote those here
if a video gets more than ten thousands views it's usually, but not always, crap
there's usually a con in it somewhere
something to hook you on to
real truth never gets promoted in regardless what way
Demonising carbon
basically enslaving humanity to "save the earth" for the elite
agenda 21
etc, etc...global governance
yes true, Gorbachev is chosen to push the " earth worship" agenda, new age, green communism,
exactly
finally we hear the truth, not that we did not know, but it's always nice to hear some simple FACTS
hmmm I like facts
All from the book from the Club of Rome
they had to come up with some scam to fool the people in accepting global governance
that was in the ninety seventies and they are proud to admit it
they come up with that scam of " global warming" it would " fit the bill"
not joking about it, it's in the book, literally.

The common enemy of humanity is Man

In searching for a common enemy against whom we can unite, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like, would fit the bill. In their totality and their interactions these phenomena do constitute a common threat which must be confronted by everyone together. But in designating these dangers as the enemy, we fall into the trap, which we have already warned readers about, namely mistaking symptoms for causes. All these dangers are caused by *human* intervention in natural processes, and it is only through changed attitudes and behaviour that they can be overcome. The real enemy then is humanity itself.

THE FIRST GLOBAL REVOLUTION

A REPORT BY THE COUNCIL OF THE CLUB OF ROME

ALEXANDER KING
BERTRAND SCHNEIDER

Re: THE IRISH TOPIC

Love your post, so true about these activists, Max, Terry, Cassandra, Olga, Patrick & Co., they are so passionate and nothing is too big or too small for them.

I just finished my 'run' of 1000 hearts, that should be 1000 people taking them home with them next Friday, maybe start wondering about this lovely little powerhouse, especially if the MC gives a good explanation.

Today's haul:

1000 Irish Selenite Hearts Gips Herzchen by Lady J..jpg (114.96 KiB) Viewed 253 times

From right to left: Max Bliss, Michael J. Murphy, Terry Lawton, Lexie Alexandra May Hunter and Ria den Breejen.

Re: THE IRISH TOPIC

ah..jee...can t keep it with thousand hearts you know
whaaaaaaaaaaaa.....
did a gifting anyway today , despite or because of bad weather
did some painting too , was pleasant, a little zen moment there....
just a bit intuitive painting, turned out not too bad at all, have had worse results
usually when I start thinking etc...and interfere with the process
they all look a bit marbledish
when the sky breaks open you see a whole web of trails so they are busy up there
they really play with the weather now
unless you have some plasterpuppies barking and taking care of it we'd hardly ever see a real blue
sky again
before I "gamled on plasterite" as it was a gamble as there were not too many reports some years
ago , I just followed intuition or inner knowledge
as simple as that, does it sound natural, good, honest, real , yep , well let , at least, try the method ,
see if it has results and voila...there we are...
years later
still pumping

Link is ok , you did well, server is not so responsive
had to try twice and it opened finally
maybe just post it here too for convenience

Paris Climate Conference – Initial Report

Olga Raffa, Max Bliss, Alexandra May Hunter, Terry Lawton and Michael J Murphy

Paris Climate Conference – Initial Report.jpg (127.59 KiB) Viewed 267 times

Chemtrails are not a "Conspiracy Theory", rather, they are a Conspiracy Fact. Anyone still falling for the ridicule being assigned by the MSM to those who are courageously fighting these programs may want to consider why a panel of citizens would go through the great effort of attending the Climate Change Conference held in Paris, France and presenting the facts before a committee, who were largely in the dark about these operations. Anyone ridiculing these people after the intense research they have done at personal cost, reputation, and career, has simply not taken the time to look at the data.

That having been said, Alexandra May Hunter returns from the Paris Climate Change Conference with a positive report. Please glance through the well prepared Powerpoint and PDF of Alexandra's presentation. For more factual information on chemtrails visit aircrap.org.

Initial Report – Alexandra May Hunter Paris Climate Conference

Alexandra May Hunter attended the Paris Climate Conference as a presenter. The title of her subject matter was, “Geoengineering: Existing State Specific Laws and the impacts upon human health, the Eco-system & Economics. An overview and analysis of currently in effect state statutes on air pollution and how any proposed geoengineering and/or climate intervention plans or programs would impact current laws, human health, the Eco-system and state economies.”

Alexandra was well received by many of conference attendees from the academic, scientific, government policy makers of varying levels, lawyers, governance, medical, biologist's, agency personnel and researchers. Although many of these people were aware of geoengineering, many were not and this was a successful opportunity to make all of these people aware of and more informed as to the dangers of this “proposed” mitigation technique.

She would like to personally thank the 130 persons who contributed to her fund for attending the conference. She would also like to convey most grateful thanks to her co-activists who also attended the conference; Olga Raffa, Max Bliss, Terry Lawton, Michael J Murphy and Patrick Roddie. The team did an outstanding job of conducting themselves in the most professional serious and well informed manner and were all successful in making geoengineering not only a part of the conversation but successfully influencing this group of 2200 persons.

Here is the poster created for her presentation as well as her more detailed power point presentation (PDF [click here](#)). Alexandra shot 100 videos of the sessions she attended and she will be providing more specific detailed reports and coverage in the upcoming days and weeks.

Re: THE IRISH TOPIC

]It was a tip from Dustsand to get most of the life pillow stuff in the pet shop or shop for agriculture, where farmers go, hmmm, usually you find all you need for making life pillows very very cheap
I get all my seaweed from there in containers of half a kilo
not by strawling along the beach....that is a seasonal thing
as you found out

it is used as a powerfood for horses etc
to keep them healthy
works for us too

also they usually have a aquarium corner in larger shops, there you can find good sand, etc etc
for crystals , gemstones, but mainly crystals and the like I always get it at a wholesaler in Austria
so cheap and top quality

big player

buys it all up by the container , you know, in bulk

therfor low prices even considering UPS

also they sell lots of powders I like powders even more work with more strength

rose quartz and crystal powders

very punchy

I spoiled myself with a selenite ball there

although nowadays I rarely buy anything

no need to , unless I d be making polarizers on the double..

Re: THE IRISH TOPIC

last post for the time being heheheh

only a mere 985 billion bovis, thats mild Jenn, are you loosing it LOL

Alex's pendulum went off the table, whaaaaaaaaaaaa

that s normal, so it settled down on 985 billion

not too bad....like having a football field of CB's....not bad at all

had to post it as these things are so rare
and yes WM still sucks
that s its job
but dont tell the groupies
focus on those who have what it takes
and proceed from there
good work

Re: THE IRISH TOPIC

No J, you lot are the real heroes, maybe we are all heroes, maybe everyone doing the right thing nowadays is.

it is good work, lots and lots of leaflets making folk " deprogram" making them finally for a change start thinking ...

without media blinders

this whole thing has to come from the grassroots to be genuine

there s no other way

I know we are supposed to feel small and weak, that s how we are trained, but , like the little beaver who start nibbling at the might oak, the oak will come down

and we dont look back for applaus or approval or fancyness, we just keep chipping away, we know we are doing a good job

we dont need confirmation, we just know inside what is right and what s wrong

it is as simple as that

Most plasterite players I know see themselves way advanced from the public etc

in a way that is true , to some extent , but on the other hand it limits possibilities for the public for those who can make it out of the spell

they will never put themselves through all the agony and stress of explaining or helping the public

I do understand that

but than again if no one does bring out the word why than they say nobody is using it etc

mainly by their sheer refusual to explain it to the ones who like to know

they often look down on newcomers

knowing nothing

A known , in our circles, german plasterite maker, it s a " she" , she called what we do , or what I do, " Kindergarten"

that s how they look at those who try to explain it to the audience

this natural energy thing you know

in a way there is some truth to it

it is not easy and we often have to make it all digestable for the once who are not in the know

but ...it is good to do so , what we do, at least giving folk a chance

not having too much prejudice towards the public

like ah ..they wont understand anything anyway etc.... jadija

true

most wont

but some can

so give those who have the spark in them a fair chance to make use of these tremendous strong tools of light

but no, most wont go there

it is so far " below them " to even talk or deal with the public

plasterite if you go below the surface is a , for lack of a better word , sjamanic tool

it is very very powerful

in the right hands

Josh often addressed this topic , didnt realise it at first
thought it was a bit hmmm I dont know
what to make of it in those days
shoved it aside in a way for later investigation
to see what s that about
although all the clues he gives in the forum thread are accurate it takes a long time to figure out
also it definitely comes out of the healing circles, period
it is never meant or supposed to be used or "marketed" as a cheap alternative to orgonite
it s not like that
it s for those who want to expand, take this energy thing beyond limits, step outside the ring and
make their own ring so to speak
in those hands the selenite really starts puming and manifesting
otherwise it would be just a wild horse in chains
that s why mainly healers, those with a clear awareness , still people though

, but somehow they "get it" and start playing with it and things start to move
in ways that cannot be described just in black on white
it does not take a genius to accomplish just a VERY aware mind, beyond any sort of control, most
people in the truth movements are unfortunately just sheeple in an upgraded controlled fashion
that s how it is
but not all are like that
as most just sing from the presented songsheet without realising it
as they refuse to be true individuals

usually this is the time all the sheeple attack me for saying that LOL
an aware person would not respond to that as it is not addressed to him or her
you see

basically it is all controlled opposition nowadays in the truth movement
nothing worthwhile coming out of that
the only real work comes out of individuals or uncontrolled groups
and there are not too many of those around
once you know how or what s going on in the truth movement , what s really going on you have to
step out of it
alltogether
also one must give up blindly believing anyone , esp those " Russel X Brand Messiah" figures given as
sheeple feed to the public
to " save us all"
and folk who refuse to be individuals get dissapointed again and again
it will not stop untill you truly leave it all behind you and start manifesting your own true reality
not easy to do as you will encounter a lot of obstacles on your way
everyone will be against you , at first at least as you will piss off everybody around you as you wont
go along with any agenda
only a few folk can stand that
and overcome it and become free
free in the mind to let truth rule
no more deception
no more control

etc

the Romans always went straight away for the druids, always

it takes guts to stand in that field on that gathering while the tent has been flattened by the weather

doing what has to be done

handing out almost thousand leaflets to folk

to get the spark coming closer to ignition

we dont know but we do what s right

we all have been conned in the truth movement that cannot be avoided

with those fake leaders

they hand out for our consumption

but some grow up and leave that phase behind and some stay there

or get out of it alltogether

also a technique

breaking people s spirit

works great

for them

living on hope is what most do

without actually doing anything real

facebook was a good learning school for me, as someone , like some others who usually try to stay as far away as we can from such circusses

and a circus it was

the ultimate control grid and some still cant figure that out

I am not saying it s all bad , gloom and doom, there are some good folk who know what s going on

but we have to be truthful

it is seriously " FUBAR " big time

big time

devastating lack of maturity

like drunken sheep all singing the mantra

what promoted down to them to suck upon

the allowed crap, aliens, arcons, reptiles, all veggie of course

oh my god you eat meat and fish oh my god you cannot ever be " spiritually enlightened , you

barbarian " that sort of crap

all the time

just sit on their butts and be " infinite consciousness" without actually doing something

oh my god are you really gonna out there and do something about it , oh my my, are you sure your

chakras can handle that in the fifth dimension

a lot of phantasy , BS, and wishful thinking going on

all this infighting going on

divide and conquer

who s at the winning hand here eh ?

well we are not there yet

it s like religious shopping that s basically what it is

if one does not suit a person any longer, no fuzz, they jump onto another bandwagon for a month

going in circles

eternally

people are trained that way today, to obey and listen to experts , always like that
never try to think
never question
so can you imagine the stress I had to endure on facebook running a group there ???
total horror

so when the first aware souls came in, Eric, Dillon, and last but not least OLG , the slovenian , I was
glad to give the forum out of hand
it also showed me the total lack of respect nowadays , really big eye opener
utterly rude a lot of folk
so superficial
like it s hollywood or something so I had to use the ban button untill my keyboard got stuck
all the time
It is very nice of OLG to restart the orgonite plus group on Facebook
even though he even talked about eh ...aliens also..LOL
he is forgiven
nobody is perfect right?
but he is on the right track and some other are too
and I noticed while ago all those " doubters" I wont call there names here
finally touched the selenite
wow....that s fast...but we have to give folk time , obviously
to lighten up, to open up
get the resin stains of their fingers whoops that slipped off my tongue incidentally wink...
as they all make good bucks using the ...artificial method, let s call it that to be nice today
could use other terms but that might give me the political incorrectness buzzer, again...
people must grow up
but they dont
they only see what they want to see
and know what they like to know not what they need to know
all very selective behavior
whatever suits the day or goal
Andrew is a good student he will get far

Old orgonite, the metal resin mantra, well that s ok, as art pieces, you know, for sale, we all have to
you know...
that s ok
no hard feelings
if you just do it correctly to at least bring in some good energy, not on the bizarre levels of plasterite
or the healing power of a life pillow
but ...you are still doing the right thing
plasterite is truth and therefor normal in my view, while metal resin is so artificial and oh boy but...it
works too, on a different level

and let s be honest a lot of folk like it because it looks good
and is very durable so , for those of you who simple cannot let go of metal resin hoopla, well, go for it
, but...if you do, make damn sure it rocks
if you use metal resin for its fancy looks to earn a few bucks on the side, that s ok, honestly
but it is not the breakthrough we work on
and you know it
but in a way metal resin , old "allowed " stuff the elite dont seem to worry too much about, is ok ,
because selenite cannot be sold properly
and as we live in a pay to live system from cradle to grave that has some effects
we dont live of just pure love you know
we like a steak once in a while too
yes Murielle, with ketchup...

so for those of you who still dont really get it , most of you, LOL, this is NOT a crusade against plastic
metal orgonite
this is about giving folk a fair chance
to make their own choices
that s what this is all about
this is a crusade against the control of the "truth movement" or in this case mainly the orgonite
movement aka business inc.
who still keep the plasterite under the carpet out of fear of losing profit and respect
what respect may that be
I dont know

Look, I like a piece of good orgonite , yes metal resin too, occasionally , as a present or something to
the non aware folk
most folk around you
there is nothing wrong with that
it looks great
but using this resin , weaker method , is not a way out
it is more like a side show
because if you try to sell plasterite well tough luck to you hehehe
you know..

people dont give a fuck about a billion bovis
we do
they dont
they just love the shiny crystals and copper coils and colors and the rest of it
that s how folk are
that s reality
so please if you make metal resin orgonite , try at least to get the techniques right ok

as these induction stuff MG makes is very powerful
for a resin piece I mean
it is way beyond basic stuff
honestly

rather dazzling for metal resin I must admit
still no match for the dorky kid though
but in resin land it is a notable step up
that is a fact

have some pics somewhere
as they were quite fancy I must say in power
but artificial and pricey ...nice christmas gift though

yes I give you your freedom but we will never get that freedom
that will never ever happen
not in a million years
and you know that too
they - WM and those clubs - keep puking on us
as we are not allowed
freedom, peace, love eh ???
bam there you go
down for the count flogging you with eh crap like eh ..." carbon chains..."" kirlian pics"bla bla ,
whatever the sheep can understand
voila
truth in a nuttshell

a banana is not a fruit because it is not green as an apple
signed His Royal Highness

voila, that s the level of knowledge you get on mainstream orgonite forums
suck on that if you like....
please dont throw up inside this premisses...

In order to make my point clear , today, yes, hold your breath I am gonna whip you with some old
school orgonite
hmmmmmmm
and you are gonna like it
no, it is not a match to selenite
it s like comparing a fly to a fighter jet but.....it looks sexy allright
but honestly metal resin is a dead end street
and somehow , deep down inside , you know all this stuff
you knew it all along
I am telling nothing new here

I am just confirming which you already knew (but did not dare to speak out on your controlled group because you d get the bird and the ban asap

Whoaa. why are you picking on Lastc ?
He's obviously made more organite than you guys
put together....since 2001.....been around for a while.!

Personaly, I,m grateful to discover a new technique,
as I'm sure he was.....I'm just glad he shared it.
Nothing like research.

As to how it works...I hinted my understanding with
last post on plaster=selenite...Millions of microscopic,
dare a say nano crystals...in conjunction with many.....,
dozen or so gems and minerals commonly used and
experimented with, in organite.

I believe it's the interaction of energies of crystal and
minerals here. The german website has a diagram showing
interaction with crystal and stones, but the captions are
in german..perhaps the missing key.

Lastc may not be a technical wizard either....just a keen
researcher / experimenter like me.

It's all about etheric energy..For goodness sake....I've
seen high Bovis readings from a guy holding up a large
copper coil. on WM.

To say you won't try it because you don't understand
the principle is just naive.....too limiting.

I apologize for disturbing your comfort zone, and I thank you for sharing your feelings.
Now go back to sleep

Here's the latest innovation with plasteriterather large pieces specifically made to be set up in a Bernoulli Ring configurationaround 80 million Bovis
Had to step back from this one for a while ... was fair singing !!!

Penny Bradley

January 1

My first one. Eric said to just make one big one first, so I would feel the energy they give off. 8+ cups plaster, 4+ cups quartz sand, 5 cups energized water. [Two cups is a little more than a litre.] I sent it Receivings after pouring with intention. I can definitely feel the vibration.

2015-04-19 20_40_43-Orgonite from Plaster - Internet Explorer.jpg (56.69 KiB) Viewed 325 times

Are negative ions good for you?

The ion depleted air of our offices and homes may cause anxiety, make us uncomfortable and less efficient, and even increase the risk of respiratory infections. An excess of positive ions may be the cause of the ill-effects of notorious winds such as the Sharav and Föhn

Dr Albert Krueger
is Emeritus Professor
of bacteriology at the
University of
California, Berkeley

There are ions in the air around us all the time, but changes in their concentration, or in the ratio of positively to negatively charged molecules, can have remarkable effects on plants and animals. Indeed, ion depletion could explain a wide range of human problems, including respiratory infections on office workers and the malaise caused by weather conditions such as the Sharav of the Near East.

Air ion formation begins when enough energy acts on a gaseous molecule to eject an electron. Most of this energy comes from radioactive substances in the Earth's crust, and some from cosmic rays. The displaced electron attaches itself to an adjacent molecule, which becomes a negative ion, the original molecule then becoming a positive ion. Molecular collisions transfer the charge, so that positive charges come to reside on molecules with the lowest ionisation potential, while electrons are attracted to the species of greatest stability. Next, neutral gas or water molecules cluster about the ions to form small air ions of four types: $H^+(H_2O)_n$, $(H_2O)^+(H_2O)_n$, $O_2^-(H_2O)_n$ and $OH^-(H_2O)_n$, where n is a small number.

In normal clean air over land, there are 1500 to 4000 ions/cm³. But negative ions are more mobile and the earth's surface has a negative charge, so negative ions are repelled from the Earth's surface. Thus the normal ratio of positive to negative ions is 1.2 to 1.

Man often encounters very low concentrations of ions, and modern city life increases the ratio of positive to negative small air ions. A 14-day study in 1971 by B. Maczýnski (Int. J. Biometeor, vol 15, p 11) an office containing four people showed that the small air ion concentration dropped as the day went on, falling on average to only 34 positive ions and 20 negative ions/cm³. And a test at a light industry area of San Francisco by J. C.

remove ions, such as stray electrical fields. On the other hand, evidence is accumulating that substantial increases in ions can have highly beneficial effects, from relieving the pain of burns to promoting plant growth.

Although the concentration of ions is quite small—less than 1 in 10¹⁸ air molecules—it is still reasonable to expect them to evoke a physiological response. For example, the male silkworm reacts vigorously to the female pheromone when it is present in the air in concentrations of less than 200 molecules/cm³.

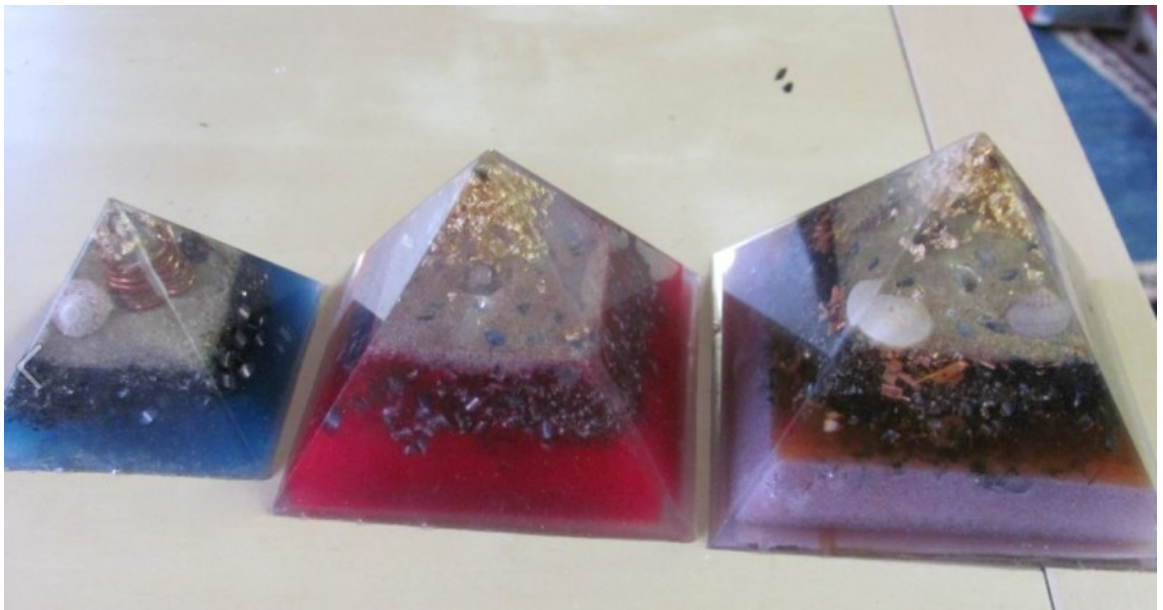

Ions speed plant growth

Over the past 17 years, the Air Ion Laboratory of the University of California has conducted experiments to detect ion-induced physiological changes in plants and small animals. The subjects were maintained in a controlled microenvironment supplied with pollutant-free air, the sole variable being concentration of air ions in the ambient atmosphere. Soft β emission from tritium adsorbed on zirconium served to ionise the air without evolving toxic by-products; selection of positive or negative ions was accomplished by applying a corresponding charge to the generator electrode.

Plants appear to benefit from increases in both positive and negative ionisation, and we have shown that such ionisation markedly increases the rate of growth of higher plants such as barley, oats, and lettuce. With seedlings grown in chemically defined media, we found that unipolar (one charge only) ionised atmospheres containing approximately 10 000 positive or negative ions/cm³ increased the rate of growth by as much as 50 per cent (as measured by integral elongation or weight), without altering the protein, sugar or chlorophyll content of the plant. In marked contrast to growth stimulation elicited by air ions,

Re: THE IRISH TOPIC

Orgon energy cone

October 3, 2014 by annyxxx | 2 Comments

As you may know, I am very tinged in terms naturopathy and when dealing with this topic, you will sooner or later to the Orgone.

First I want to clarify the question of what is a Orgon.

Wilhelm Reich for the "primordial (always present) dominated cosmic energy called orgone.

Orgon is basically like a converter of negative energies in neutral, or positive energy. Thus, Orgon changed around the vibrations around him, and the people who are dealing directly and indirectly with him, be more relaxed and peaceful.

In addition, the Orgon has the power, which he call chemtrails - which I have often observed just last summer, to dissolve its active circle of 5km well and thus to neutralize in this area.

Chemtrails are used to our climate and weather change!

Furthermore, he neutralized the all around us electrosmog and this is shown to be harmful.

Even in my household many electrical appliances are used and I would wager that we have a tremendous amount electrosmog around us.

The conventional Orgone were refined by Timo so long in development until it these beautiful energy-cone case came out. An energy-cone, which is several times higher in its effect and also are still absolutely harmless for the environment.

Because you have to know a Orgon is normally constructed from polyester resins, which, though the inside of the orgone can be visible - and so a Orgon really looks beautiful from the inside - but that is absolute crap for the environment.

Timo's Orgone are cast in plaster and hide inside their beauty of crystals and gemstone mixtures. The plaster has the advantage that this during curing many thousands of forms small, but not insignificant gypsum crystals and this amplifies the power of orgone even more.

At the core of the cone are located next to many smaller minerals and gems also a great gem, its orientation is upwards.

The energy cone is placed in the apartment / house, the vibrations penetrate matter.

Since he is really very elegant in my opinion, it can be really placed anywhere.

I have mine set up directly at my workplace to the computer where it is located in close proximity to the phone socket, router and Co..

23.jpg (25.93 KiB) Viewed 322 times

22.jpg (19.14 KiB) Viewed 322 times

Since there are in addition to the large cones and small energy heart with Timo who share the same mode of action have as the cone, but just concentrated, I have a set of them in my bed, because there is always the phone of my husband and of course the heating of the waterbed is running all the time.

And whether you believe it or not, since the heart is in our bed, I sleep much better at night again and therefore feel the next morning rested and relaxed.

Skeptics say now, of course, again, that is the imagination, but who has not tried it once himself, who should rather make no judgment, because not everything that can not be explained is automatically Hocus-Pocus.

In addition, I will from now on also always wear a heart in my purse with me - to let as much light and love come into my life as possible - of course, in direct communication with my love and light.

How do you like the energy cone? Do you have experience with electromagnetic pollution and Chemtrails?

Re: THE IRISH TOPIC

ah...we love our resin brothers and sisters too you know...

love plasterite2.jpg (33.92 KiB) Viewed 309 times

just not as much as we love the plasterite ..

love plasterite.jpg (36 KiB) Viewed 309 times

no we are not politically correct here
far from...

it is just sad most stay at that level , it was a nice tool of light, but it got overrun big time
but ignorance is a common value nowadays
this herd thing, herd immunity, herd mentality , ah and the rest of it
ok we will leave them in their happy bubble from now on...
but at least we leave them in peace
we dont attack them
we just speak out things as they are
against all odds
we have the right to do so
I wonder how long sites like this will be available
if these control freaks keep pushing
as they always speak with forked tongue
world army , world peace means annihilation of all opposition that s what it means

when I came home today they were at it , you know , big time
unbelievable chemdumps , aircrap blasting, so I connected the second broadcaster
it s for when things get too bad , worked and voila, within 30 min. red helicopter
right from me this time
no hiding
doing two circles over the street and left right away
just beating us into obedience
you should see the sylphs so beautiful
too beautiful to take pictures
no need to
it s all there
so the chemcrud is dealt with swiftly here
also gifted some small pieces in a parc
where I work , close by so could see big blue hole appearing fast
lots of sylph plays, etc, no white out , so you can see how much they really release up there
amazing
thought a small piece would not be so strong but it is very strong
and that s just a small piece
like an orange
that size
size is not so important but spreading it out is...

it s a big agenda out there, way beyond geo engineering alone, it s like bringing us into this new
feodal system
of control hand in hand with austerity

making us true peasants again
or true pagans again, who knows
carbon taxes, legislation, can we use that word still, we are just sold down the river
and that's how it is but in a scientific way, not with the king's knights coming to town and smashing it
up to make an example, no they do it in such a way that the herds will go into this new world order
willingly
without reasoning

nah..this resin bla bla it's not a real rant
it's just telling folk how it really is
without softening it up first
a little rough but fair in the end
fair play
I always found it mysterious to say the least the control grid is not so impressed by metal resin
they don't like it but they aren't really on top of it
like it is not really hurting them too much
for obvious reasons, you know, the money
and the energy emissions themselves too are too weak too really make a breach into that wall
so these little plaster things I gifted are strong like full fledged CB's
it's just like that
but work much better as they are in tune with nature
so nature picks it up and deals with it very pleasantly

if I'd really do a full bells and whistles rant against this plastic metal ALLOWED version
oh boy
you haven't seen a real rant yet
but what use
as the truth is obvious enough
a lot of folk is getting fed up with what's going on with this control crap in the orgonite general staff
the HQ
a lot of folk is turning their backs
I know a lot of them
they detach fast now..talking about the resin club members here, ...they are fed up with what's
going on there
from that mumbo jumbo childish annoying atmosphere it has turned itself into
only those who suck up properly are allowed there to do their brownnosing to the gurus
all not too proper folk, meaning, those who can still think and figure out how badly there are getting
screwed are leaving the place or are banned so you see just all happy smily silly stories on WM and
EW and all that
like a sect or cult sort of thing
no free thinking allowed
never ever no mam

whatever this weather manipulation is the battering ram for the nwo
that's a given
that's what's needed to bring it all in
this globalistic rubbish through their secret treaties
that's because we live in a "democracy" yeah

never have never will be
Nero and Caesar were just the same as the cabal we have now
just the same
psychopaths
" they d never do that "
no...YOU would never do that
they dont give a fuck and that s as it is
they truly hate us and from their psychopatic point of view there is something to it
if you reason the way they reason about us
that s why they are all into depopulation, genetics and the rest of it
it s always us who have to go ain t it so
never them
it s always us
who supposedly are the virus of this planet
that s how they brainwash us
overpopulation
yeah right
the western countries are in a free fall now
just because they open the borders now to let other folk in to mix it all up into a mushy soup
for easier control ,that s what emigration is for
so in the end you have five nationalities living in your street and nobody is gonna stand up for anyone
all " kaputski" in that sense
no " clan" anymore
to stand up to anything
that s what it s all about
no black magic just reasoning will do thank you very much
what we mainly see is the grabbing of the worlds resources things you need, like water , energy, it s
all geting
privatised , sold for a penny to those wallstreet bunch
than they raise the prices and lower service and we are suckered again
and the government says sorry mate we cant help you it s a private company hihih
these psychopatsh always have that give away smirck
bush sr got it too
the smirck
if we are succesfull
and we will be ...smirck smirck..
they really laugh at us
could not give a shit
does not even occur to them we are human
it s not in their framework
does not compute
at least they are serious about it
wether we like it or not they do their homework properly
kind of easy if you control the banks and the money con
they dont really mean that
no really
you think they draft up all these agenda s to pass time or what
I dont think so

at least we cant say they are not honest about it
in a way they are
from their sick point of view
and these are rather mild quotes
once heard David Suzuki going on a rant wow...
well you are not in la la land anymore
David Suzuki, the guy who loves to protect fluffy animals....

basically they are all psychopaths
Blair, Cameron, all got the smirck...
while they sell off Iraq oil fields months before the invasion, that sort of thing
it a all a big lie
conology
nothing really fancy about it once you look through it all
it s just done in a more scientific way
using linguistics and propaganda
what they call mind control
mainly through media
works great
look around you
does it not work great
it does work great
so the elite is not too worried about it all
the last thing they want is individuals who do their own thing
so annoying to them as they cannot control it
they love big groups , that s why they give us these clows like Ickey and Jones inc.
infinite consciousness hmm ok...andwhat s that s gonna change ?
ehnothing
but it fills up the cash register rather fast mind you....
all done to make this world a better place
and if you buy enough crap from those jokers you get the " I Love you " sticker , for free !!
wowoowowowow

[youtube]U-5VnMliKPY[/youtube]

in the old days the royals said to the peasants, that s us, mind your place
as we are being trained to adore this new wold hoopla
but it is not in the policy framework of clubs like Greenpeace to open the book on chemtrails
nope
they are , like our Suzuki guy, more into hugging little fluffy animals...
ah well old news eh..

just now I saw a plane come close to the energy field, orgone canopy if you want to use that word
and started spraying , just like that, amazing eh
amazing
in clear daylight

trying to cover that massive hole
have not seen that one before
deliberate spraying on purpose I mean
interesting
yep it s for real

so I hope your tools of light are for real too, mine are
and they cost less than a big sandwich with coffee
and if you have some long electric wire in the garage well I d say wrap it up
because these broadcasters cannot be matched , period.
you can swing as many CB s as you want but ah well
we all like a good laugh eh
wish I had more aware folk around me to give these devices to spread it out more
but I dont
just sheep
socialized
when you point up they start drooling and looking at you with that typical " glazy look"
you know the look
like you have three heads suddenly
if you are lucky you might awaken them but dont count on it
but it can happen
later on
than they say hmm I think you are right there is something not right with the sky ...
than you say , wow , no shit Sherlock !!

please dont try to laugh at them
we all were like that once , werent we
you as well as me
we are were dumbed down in happy land
long ago
untill the cracks started to appear on our happy bubble
and the house of cards came down

ps nobody " woke me up" I eh ..woke myself up in a sense
while watching garden pictures
I sensed things were not right with the sky
but I could not figure out what it was
but some sort of survival instict kept pushing and
making me notice these lines more and more
every year
untill I hardly had a summer left
just whiteouts
ruined my "bikini tan lines" LOL

and I thought WTF is going on
and I looked at the garden photos over the years and there it was
more and more lines
each year
how odd
why is the TV not mentioning it ?
yes I was a sheep too, long ago....
now we know the media is there to dumb us down
to keep us in la la land
not to bring us out of it
but , I started looking for those things and stumbled upon the term " chemtrail" and geo engineering
and the rest of it
and that s when my bubble *which was already open to some extent* really broke apart
whoosh
no more bubbles
than I started looking into possible solutions
and rather quickly stumbled upon this "orgonite " circus
went through some groups forums and oh boy what a joke
so I left that behind fast
and looked further
than met this healer Steve
at least he pointed out that his mate was having great succes with a natural solution
using natural materials like beach sand, crystals, plaster of paris , salt, jadija
thought is was a hoax but looked into Steve if he is trustworthy and he was
so he pointe me to orgonite plus
early 2013 , spring
and hmmm...that s when I learned the ropes
mainly by Stephens reports on a down to earth level of working with energy
in an understandable fashion as most talk was WAY above my little head than
the stuff Josh talked about I could not understand too much of it back than
and they all got harrassed and banned and so forth
so yes must pump otherwise they would not be doing that
still took me some months to grab my guts together in trying to play with it
still thought it was a hoax
or some sort of disinfo or so advanced I could never make it work
etc
actually it is not that I did not believe it would work, as inside I just knew it would work, it is I could
not believe or accept the level of disinformation put out there by the system to keep folk from
experimenting with life force energy
aka orgonite if you wish to use that word

the Level of deception
well yes, it is like that
it s not a little side show it is total banning of selenite at all costs
play with resin as much as you can buy but if you touch the plasterite boom
they dont like that
of course they cant stop it but they do their best to keep most folk out

dumb them down even more , succesfully I must say
look around
they do a good job at ridiculing and brainwashing the orgonite community
if we can even call that herd of closed minded bunch such
it s not a community it is what it is
it is a dogma
Holy roman church
you obey, fine
you dont obey, heretics go to the fire
case closed

Quotes from the population controllers

“Since its inception, the U.N. has advanced a world-wide program of population control, scientific human breeding, and Darwinism.”

-Claire Chambers, The SIECUS Circle: A Humanist Revolution.

“The present vast overpopulation, now far beyond the world carrying capacity, cannot be answered by future reductions in the birth rate due to contraception, sterilization and abortion, but must be met in the present by the reduction of numbers presently existing. This must be done by whatever means necessary.”

Eco-92 Earth Charter

“The United Nation’s goal is to reduce population selectively by encouraging abortion, forced sterilization, and control of human reproduction, and regards two-thirds of the human population as excess baggage, with 350,000 people to be eliminated per day.”

Jacques Cousteau

“Childbearing [should be] a punishable crime against society, unless the parents hold a government license ... All potential parents [should be] required to use contraceptive chemicals, the government issuing antidotes to citizens chosen for childbearing.”

David Brower, Executive Director of The Sierra Club

“If radical environmentalists were to invent a disease to bring human populations back to sanity, it would probably be something like AIDS. It has the potential to end industrialism, which is the main force behind the environmental crises.”

Earth First!

“At present the population of the world is increasing at about 58,000 per diem. War, so far, has had no very great effect on this increase, which continued throughout each of the world wars..

War has hitherto been disappointing in this respect, but perhaps bacteriological war may prove effective.

If a Black Death could spread throughout the world once in every generation, survivors could procreate freely without making the world too full. The state of affairs might be unpleasant, but what of it?"

Bertrand Russell, *The Impact of Science on Society*

"The first task is population control at home. How do we go about it? Many of my colleagues feel that some sort of compulsory birth regulation would be necessary to achieve such control. One plan often mentioned involves the addition of temporary sterilants to water supplies or staple food. Doses of the antidote would be carefully rationed by the government to produce the desired population size."

Paul Ehrlich, *The Population Bomb*

"A total population of 250-300 million people, a 95% decline from present levels, would be ideal."

Ted Turner, CNN founder and supporter of UN

"If I were reincarnated I would wish to be returned to earth as a killer virus to lower human population levels."

Prince Phillip

"In searching for a new enemy to unite us, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like would fit the bill ... All these dangers are caused by human intervention and it is only through changed attitudes and behaviour that they can be overcome. The real enemy, then, is humanity itself."

Alexander King and Bertrand Schneider, **Club of Rome**

"Let's stop telling anyone that they have a generally inferior genetic quality, for they will never agree. Let's base our proposals on the desirability of having children born in homes where they will get affectionate and responsible care, and perhaps our proposals will be accepted."

Frederick Osborn, Galton Lecture 1956, in *Eugenics Review*, vol. 48, 1, 1956

"There are many ways to make the death rate increase."

Robert McNamara, *New Solidarity*, March 30, 1981

"To bring about depopulation of large cities according to the trial run carried out by the Pol Pot regime in Cambodia. It is interesting to note that Pol Pot's genocidal plans were drawn up in the US by one of the Club of Rome's research foundations, and overseen by Thomas Enders, a

high-ranking State Department official. It is also interesting that the committee is currently seeking to reinstate the Pol Pot butchers in Cambodia.

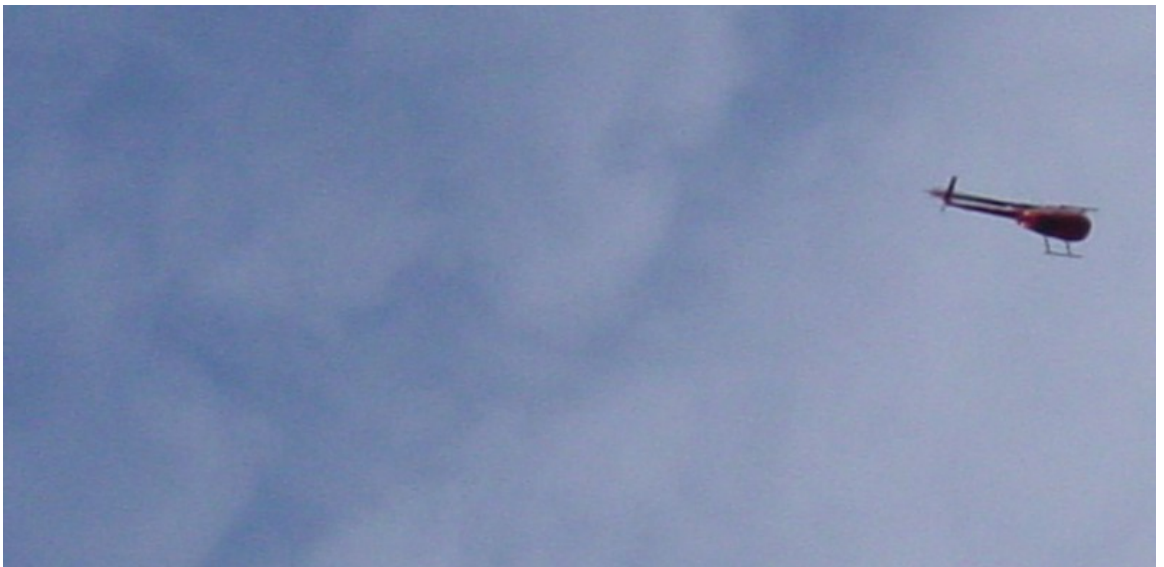

“...To cause by means of limited wars in the advanced countries, by means of starvation and diseases in the Third World countries, the death of three billion people by the year 2050, people they call ‘useless eaters.’ The Committee of 300 (Illuminati) commissioned Cyrus Vance to write a paper on this subject of how to bring about such genocide. The paper was produced under the title “Global 2000 Report” and was accepted and approved for action by former President James Earl Carter, and Edwin Muskie, then Secretary of State, for and on behalf of the US Government. Under the terms of the Global 2000 Report, the population of the US is to be reduced by 100 million by the year of 2050.

.”

Re: THE IRISH TOPIC

Link you provided did not seem to work, anyway, if you have another one of Max just let me know, or just post it

always interesting to see

not too much clutter with those guys Max and Terry

it took us also a time to get this going, this awareness thing and all, this "waking up" as it s called nowadays

etc, so you are creating future gifters remember that

maybe just one out of five hundred who knows, but that s beside the point, the point is you push the energy forward in a good way

that s what matters

besides we , the gifters, do the energy thing also, mainly, so that s taken care off

you do that too I know, and others there , yes, everywhere I go the skies are crap so not too many gifters in this part of europe

obviously
does that come as a surprise
the little piece I gifted in the parc, yesterday
anyway, while waiting in the city to leave, yep the black helicopter, caught one, with just a tiny little
piece
amazing
as I was standing on high ground while being there, saw it coming in from huge distant in a straight
line, too far left of the city
than suddenly slowed down , even though it was flying too slow anyway, and turned hard right,
straight for the park
could clearly see it, it dived on it like a hawk on a mouse, kept hovering over the part for twenty
second doing half circle and left with normal speed
but still way too low
they sure pick it up
lots of sylphs too and you can clearly see a blue hole over the centre of the city and that s just a tiny
object
fits in your coat
four crates of energy tools present
ready to be deployed

Re: THE IRISH TOPIC

heard lady J owned another tower today

good work
yeah did some gifting too, nothing fancy
just fifty kilo or so ..LOL
as nothing has ever stopped ONE single chemtrail
for a decade except ...well ...you know what I want to say ...

that was a big one
thumbs up
nice catch..

Still trying to get the proportions for the Energy Cone right. Any comments?
A bit of 'prettying up' went on today.

[Re: THE IRISH TOPIC](#)

yep I know the feeling I often , well sometimes, go back to good gifting grounds
double the dose

Even dedicated one cone to you

one of the fast plaster types I used, so slick finish
sending over some good vibes there

feeling somewhat slow today
making some coll silver
strange weather here
weird weather

thinking about something, maybe, I say maybe, we can hand over the forum to OLG ?
Or anyone else you think might be appropriate
Or at least make him or her admin, you know, so he can keep things in line here too
if he wants too
anyway think about it
if you have a candidate I ll be glad to hear LOL

you know what I mean
are there any postings at all on FB?
hmmm...
or maybe one of the Irish girls ?
as basically I am all through with many things
as it is something that is mainly meant as a library
but I know if we stop , than it stops
in essence that s not a bad thing
more time for other things
because most important aspects of selenite cannot be simply discussed so what we see is just the
first layer
of an onion
the effect of the life force energy
anyway, think about it, see if you can come up with something or else I ll lock this forum down soon
you know , to keep it as it is and hopefully it will be afloat for a while
who knows

*cone graveyard and not so good outcomes
good for gifting though*

Re: THE IRISH TOPIC

Lovely photos, thanks for the dedication

I'll mention it to OLG, but wish you'd keep it open, as it's 'your baby' - maybe just let it tick over. No there isn't much activity on the two other pages, mostly Irish stuff - we have the enthusiasm of newbies. I asked on one page for people who never said anything to give updates, no results

There's good posting on our Irish page.

Note from admin

yes ok, I'll leave it open as it is

but I won't be around here much more

if you want me you know where to find me

and I can jump in

but for now it is radio silence from my part

Re: THE IRISH TOPIC

maybe I ll hop in once in a while

we will see

can t leave you alone for too long

ah well...

one of the things in waking up is you will become lonely

as you are surrounded by the Iphone zombies

those who call you conspiracy nutter, who give you the look if you point up of what s going on that folk

the 87 per cent, at least

yeah waking up aint cheap

truly waking up , not being the bitch of some pied piper like most out there

popular ? couldnt give a damn

in the state we are in now I think it s not really appropriate to deal with that mumbo jumbo

the spraying today was horrific

that s the right word

all day long non stop

almost gave me a headache just watching it

makes your stomach tumble

they no longer hide the fact they truly dont give a fuck about us

this is for serious and that s why I keep all crap out of this forum

for the handful who have a reasoning brain left

so few I must repeat that

most are gobbled up by the new age agenda

can t promise anything from here on

there is not much in it for me

besides the good work

no money

no perfumed letters even

what keeps me going

you know what it is

and make sure to keep that going

in whatever way

at this stage we know the plasterite will never be allowed so

we have to get over that part of it

does not matter so much as it is a healing method that is only of interest for healers, special folk

not much glory in this but a tremendous lot of life force energy

and I would not want to have it any other way

Re: THE IRISH TOPIC

Had a little 'chat' with a friend this evening - he said 'S wasnt feeling well today decided to put a piece that u gave me over her heart chakra in her bra, ended up causing a popping sensation in her head for about an hour after which she felt a lot better.'

I said: Well done to her for trying it, and glad that it seemed to help, hope she stays 'improved'

Him: def had a positive reaction, stuff must work

Now he tells me he'll link up with Juliet and start pouring, brilliant

Re: THE IRISH TOPIC

I can't resist posting Murielle's new creations that she's taking to Belgium to sort out things there! Lovely creative and unusual work as always from her.

Selenite pyramids inside resin orgonite

Re: THE IRISH TOPIC

You wonder where I get my energy, it's fueled by fury that unknown faceless people, groups, or organizations have decided that it's ok to spray us, for whatever reasons, and most of us suspect they are not well motivated. Then I say to myself, don't get mad, get even. It will be an uphill struggle but we are ready for it, pushing on raising awareness both of chemtrails and selenite, a little daisy pushing up through a concrete path, we have the courage of our convictions. I'm very happy to say a few more people each day at least wonder about selenite, and if a fraction of those take action, how great will that be

Re: THE IRISH TOPIC

bluntly speaking actually they have declared war on humanity, a hidden war one might say, covertly as they often proceed contributing to their " great work" as they call it. In certain books written by them, the lower level handlers it is all layed out , no mystery there

not much "theory" also. Just blunt facts. Just a stepping stone towards their utopia

nothing new under the sun

old agenda

we are the pebbles that land uncontrolled in the water and they cannot predict what effects it will have

that s why they keep the selenite hidden, the usual propaganda, to keep folk in their happy bubble of consciousness

and it works for most. If anything that drives them crazy it is the free individual

most folk who wake up think they are individuals but I have not many who are true individuals

self reasoning, thinking, cutting through all the brainwash and slogans fed into us from above

as most folk unfortunately watch MSM, so they are goners

they will never advance

it is as simple as that

we are in a way untouchable so to speak as we just give out truths and facts

no mysteries , no cons, tricks, hoopla, nothing in it for us

no gain personally, no glory, no limelight, no fans, certainly no money, that s our strenght as that way they, the trolls and the rest of the jokers can t come down on us you see

that s the secret

there s still not much information to be found

about this natural method

including the life pillow by the way

and the broadcaster

nope

took the broadcasters offline for several days, just to check and the spraying is unbelievable in the last days

almost white out here, everywhere

so activated them again and within a few hours it was in balance

big sylph parties

but it shows us the depth of the increasing of it all

as most are living under the spell they really open the throttle now

they really love us you know

no more and more do get aware and so they have to get rapid now on this agenda

obvious to see
it s more than a little daisy J, it s like a big sunflower

yes happy to hear too more coming in
we wont hear it anywhere
except here
if you read the old thread, well old, just some years old, you see most members left all those orgonite
communities as they started to show their true colors, so there was no room for them there
the whole attack against a wonderful free method is one big psy op
no mystery there, money rules
can t believe folk still fall for that control grid
but can t believe folk still watch TV and go voting ?

Oh I think they are surely motivated
I would not call them people as they are not part of us
they are psychopaths , they are different than us
doing things we could never do
but they can
they dont need sleeping pills you see
it s just the way they are
different
Sheridan does a good expose on that in my view
he sucks at most other topics but that one is very good
so it goes all way beyond playing the predator you see
way beyond all of that
won t spend much time on those toppics
sheeple are sheeple and they choose not to know
they choose not to make a stand
could talk long on this but...most has been said already
so...
here come the sylphs...keeping the evil in check properly

Re: THE IRISH TOPIC

Just showing off my latest pieces

found a willing volunteer so...

but as mentioned in another topic I am in my " monomyth" now, doing my own journey through this all

leaving the " alternative movement" way behind me.
There is not so much to find there anyway if you truly wake up.

Of course that does not mean protesting, geo engineering movements, awareness , all of that is not necessary
on the contrary it is more necessary than ever and I feel deeply for those involved who stick their heads out in Ireland and a few other places
doing the right thing on a grassroots level as that s the level the system just cant stand
it is beyond them and they know it
that s why they fund all the big players in the movement to move the awakened sheep back into the farm
they like herds, herd management, so easy ...to control
they dont want us to think for ourselves, imagine that, thousands and thousands of aware uncontrolled sheep like us
leaving the field and go on a strawl into awareness cruising throught the reality, the landscape, etc, finding out things
interacting with another, without leadership, no that surely freaks them out
that s actually their worst nightmare
so leave the hollywood alternative movements behind you and make your own movie
they cannot predict what it s gonna be you see
that s how it works
remember to work with intuition or intention , so important
in a way the selenite natural way we use is more provable than love
as how can you prove love
with selenite you can clearly see , notice the effects around you
you dont have to guess there
sky cleans up nicely and fast
lots of energy fields aka sylphs to play
and many changes both inward and outward

plasterite is not so fancy megacool and has no bling bling to it
but once you taste it you would not want anything else
there is not really a comparison to it

Re: THE IRISH TOPIC

hehehe...received another , since long, dazzling letter from our man from Holland
another hero that s not really promoted to the public like most things that really make a change
will report on it later
